Maternal health of Black women is often overlooked but has huge impacts on society. With the rising deaths of Black women during the birthing process, this issue is one that can't be ignored!

This Change Talk examines the true implications of maternal health on the Black community. We will discuss the documentary *Afterbirth* featured on Hulu and talk with subjects of the film who are living with the real life impacts of this issue, medical practitioners and elected officials who are at the forefront of creating change.
